PROFESSIONAL FEES AND ASSESSMENT SERVICES

Services are billed in accordance with the recommended fee schedule for licensed psychologists. Fees are estimates and may vary based on client needs, assessment requirements, and case complexity. **Licensed Psychologist: \$250 per hour.** This rate applies to therapy, assessments, consultations, school collaboration, case management, travel, report writing, record reviews, and virtual or in-person clinical services.

AUTISM ASSESSMENTS

Children under 6 years of age: This assessment typically requires 14–16 hours of clinical work at \$250 per hour, with an estimated total cost of \$3,500–\$4,000. It may include the ADI-R, ADOS-2, cognitive testing, feedback, and report writing. Additional speech and language assessment may be added for \$525–\$700.

Individuals age 6 and older: The estimated total cost typically ranges from \$3,500–\$4,000, depending on the assessment needs and level of complexity.

PSYCHOEDUCATIONAL / ADHD ASSESSMENT

Standard assessment: 12–14 hours at \$250 per hour, with an estimated total cost of \$3,000–\$3,500.

Includes cognitive testing, academic testing, ADHD rating scales, questionnaires, feedback, and a written report.

Extended assessment: 14–16 hours at \$250 per hour, with an estimated total cost of \$3,500–\$4,000.

This option is recommended for more complex presentations or cases that require additional review, consultation, or documentation.

COMPLEX / COMPREHENSIVE ASSESSMENT

Comprehensive multidisciplinary neurodevelopmental assessments are intended for individuals with complex behavioural, emotional, or developmental needs. These assessments may require up to 20 hours of clinical work, with an estimated total cost of \$4,000–\$5,000. Depending on the referral concerns, they may include neurocognitive testing, personality assessment, occupational assessment, speech-language assessment, paediatric assessment, psychiatric assessment, or other clinically relevant assessments.

CLBC ELIGIBILITY ASSESSMENT

These assessments typically require 10–16 hours of clinical work, with an estimated total cost of \$2,500–\$4,000 depending on the complexity involved.
